

Conclusion

Claim 58 is corrected herein to include underline markings for the entire recitation of the fusion board that fuses the first electronic image from the first sensor with the second electronic image from the second sensor. In the previous amendment, the underline was inadvertently omitted from part of that limitation. This amendment addresses objections and other matters of form raised by the Examiner.

Additionally, claim 58 was amended herein to correct an error that occurred when adding the revision markings, wherein "LWIR" was inadvertently removed from the 10th line of claim 58, and is now added back in. Further, additional clarification to the revision markings was provided for claims 49, 50 and 55 and the word "device" was added to line 5 of claim 59 for consistency. No new matter is believed to be added.

For all of the above reasons, the applicant respectfully submits that the above claims recite allowable subject matter. The Examiner is encouraged to contact the undersigned to resolve efficiently any formal matters or to discuss any aspects of the application or of this response. Otherwise, early notification of allowable subject matter is respectfully solicited.

Respectfully submitted,
Stevens & Showalter, L.L.P.
